

More mental and behavioral health supports are in place to foster resilience, mitigate trauma, and support recovery across the lifespan.

This goal is in action...

Crisis Intervention Systems

Working to ensure that all NCMA towns have access to full time and sustainable co-response (mental health clinician embedded in police depts) and a hub model for follow-up and preventive referrals to local support services.

BIPOC Mental Health

Developing a network of BIPOC mental and behavioral health providers in NCMA and a BIPOC mental and behavioral health crisis toolkit.

Healthier Relationships

Promoting awareness of interpersonal violence and human trafficking as well as existing services and supports.

Policy change

Supporting policies that increase access to alternative modes of therapeutic services.

Knowing your why

Working with NCMA school districts to collect data on student behaviors (substance use, sexual activity, self-harm, mental health status, nutrition, belonging, safety, etc)

Do what works

Working with NCMA school districts to research and implement K-12 evidence-supported interventions and comprehensive health curricula
